

**IBC 2012 STAND 8.B96**

## **CUSTOMIZATION IS KEY AT JAMPRO ANTENNAS**

**MANUFACTURER'S TARGETED, REASONABLY PRICED SOLUTIONS TO SERVE AS HEART OF  
IBC 2012 EXHIBITION PLANS**

Sacramento, CA (9 July, 2012) [Jampro Antennas, Inc.](#) — a world leader in the manufacture and design of antennas, combiners & filters and RF components for every application in radio and television broadcast including DTV, DVB-T, FM and HD Radio solutions — will demonstrate its commitment to serving the needs of individual broadcasters with a full complement of customizable, high-quality and reasonably priced systems at IBC 2012 in Stand 8.B96. Jampro, founded in California where it is still headquartered, has been delivering systems tailored to the specific requirements of over 25,000 broadcasters worldwide since the company was established in 1954.

“At Jampro, customizing each product to accommodate the end-user reflects our internal teamwork, commitment to excellence, and dedication to customer relations,” states Alex Perchevitch, Jampro president. “Modifications may include adapting a standard antenna for multiplex applications, developing a custom directional pattern, or engineering an antenna to withstand harsh environments. Then, before shipping, directional patterns and pattern measurement studies are conducted on our 7,000-foot full-scale test range to guarantee the best coverage. The finished product often exceeds customer expectations.”

At IBC 2012 Jampro will exhibit broadband solutions that bring great value and outstanding features to all segments of the broadcasting industry. Highlights include the JAT-U UHF super turnstile and JUHD Broadband UHF panel antenna that are both radome-enclosed, the Prostar JA/MS-BB Broadband UHF Slot Antenna for multi-channel/combined channel operations, the affordable RCEC (8”) mask filter featuring superior performance, and the compact and modular RCCC constant impedance combiner. The Company’s economical and flexible antennas, combiners & filters, towers, and RF components will also be on display. In addition, Jampro will emphasize the vast scope of services –spanning from concept to completion – available from its Service Group.

### **About Jampro**

Jampro Antennas Inc., established to answer the need for quality broadcast systems at a reasonable price, is a leading supplier of antennas, combiners & filters and RF components for every application in the broadcast industry. Reputed for innovation and customization, Jampro builds each system to the specifications of the individual broadcaster. From the first system delivered in 1954 to those installed today, the Company is committed to consistent performance and quality founded on solid engineering. Today, over 25,000 broadcasters worldwide benefit from the quality and performance provided by Jampro systems.
