

Vietnam Television Calls on Jampro Again for VHF and UHF Antennas

Sacramento, CA (July 10, 2013) -- [Jampro Antennas](#) of Sacramento, California has been awarded another contract by Vietnam Television (VTV) to supply two high-power broadband antennas, one for VHF Band III transmission, the other for UHF. Both antennas will provide coverage of CanTho, the fifth largest city in Vietnam, and the largest city in the Mekong delta.

“This follows a major 2011 order for ten Jampro DVB-T (Digital TV) antenna systems that were installed at sites located throughout the Socialist Republic of Vietnam,” said Alex M. Perchevitch, Jampro president. “For many years, we supplied Voice of Vietnam (VOV), the founder of VTV, with radio broadcast antennas. That excellent relationship and the proven field performance of our equipment led to this latest award.”

The JHD-HV4 is a half wave spaced, horizontally polarized flat panel, dual-dipole high-band VHF antenna that can broadcast on Band III at 174 to 230 MHz. Rugged galvanized steel construction ensures many years of dependable performance. The JHD antenna has been proven to have excellent bandwidth and VSWR. It's ideal for VTV's broadband/multi-channel operations. Many standard and custom directional patterns are available to fit VTV's coverage requirements.

The JUHD UHF antenna was selected by VTV for two primary reasons. Due to a modular design, it gives VTV flexibility to configure various elevation patterns so coverage can be customized to suit the topographical challenges of Vietnam which range from flat deltas to mountainous areas exceeding 3,000 meters. VTV engineers worked with Jampro's technical staff to customize patterns to optimize coverage for the sites.

Secondly, the JUHD antenna's robust stainless steel construction has proven reliable in hot, wet tropical climates. Fiberglass radomes provide additional panel protection.

Jampro is also providing its own manufactured Proline brand of rigid transmission line for both installations and related RF components.

Vietnam Television, or VTV, is the national television broadcaster for [Vietnam](#). Each major city and most of the 64 [provinces](#) have their own TV stations. VTV broadcasts several terrestrial cable, satellite and regional channels, plus an international channel.

About Jampro

Jampro Antennas Inc., established to answer the need for quality broadcast systems at a reasonable price, is a leading supplier of antennas, combiners & filters and RF components for every application in the broadcast industry. Reputed for innovation and customization, Jampro builds each system to the specifications of the individual broadcaster. From the first system delivered in 1954 to those installed today, the Company is committed to consistent performance and quality founded on solid engineering. Today, over 15,000 broadcasters worldwide benefit from the quality and performance provided by Jampro systems. Additional information on *JAMPRO* can be obtained at www.jampro.com.
