**AlanDick Broadcast & Jampro Antennas at Broadcast Asia 2016  
Unequaled Experience for High Power Broadband UHF Solutions**

Manufacturer to bring value, service and quality to both TV and Radio Professionals  
Sacramento, CA (April 12, 2016) Jampro Antennas, Inc. — a world leader in the manufacture and design of antennas, combiners & filters and RF components for every application in radio and television broadcast including DTV, DVB-T, FM and HD Radio solutions — will return to Broadcast Asia with both TV and Radio broadcasters' needs in mind. The manufacturer will show their full line of antennas, combiners, and filters that represent a legacy of value, service and quality at this year's Broadcast Asia 2016 Show in Booth #5E3-08, in the UK Pavilion. The product family includes the popular UHF Broadband panel antenna, the UHF Broadband Super Turnstile for UHF Bands IV & V, and the competitively priced RCEC family of mask filters for TV, and a series of Broadband FM

“We have so many great solutions and options for our customers in the radio and TV broadcast market,” said Alex Perchevitch, Jampro president. “Jampro has not only provided more than 25,000 broadcasters worldwide with top-performing antennas, combiners, filters and RF components, but have proved our consistency and dedication to our world-wide customer base by serving the needs of individual broadcasters with fully customizable, high-quality and competitively priced systems. At this year's Broadcast Asia, we are showing attendees how our solutions address every type of broadcast application.”

**UHF Broadband Panel Antenna for All Polarizations**

Jampro's UHF Broadband Medium Power panel antenna is now available for Bands IV & V in all polarizations: CPOL, EPOL, HPOL and VPOL. The antenna is designed as either a side-mount or a top-mount for DTV, ISDB-T, DVB-T/H, NTSC or PAL broadcasting.

**JAT-U UHF Broadband Super Turnstile Antenna**

Minimum windloading while providing broadband response makes the JAT the perfect answer for applications where either one channel is defined, or multiple channels are combined. The radome-enclosed unit can be either top or side mounted on a tower offering long life and many years of continuous service, ideal for broadband multi channel UHF applications. Jampro's Broadband Batwing IV/V 470 – 860 MHz Antenna has many outstanding features that bring great value to today's broadcaster.

## Prostar JA/MS-BB Broadband UHF Slot Antenna

Jampro's JA/MS-BB Broadband UHF Slot antenna, part of the legendary Prostar™ line, offers an economical alternative to buying, installing and maintaining multiple antennas. A single, compact solution, it conserves tower space and minimizes wind loading. Especially designed for multi-channel or combined-channel operations in analog-analog, analog-digital or digital-digital TV applications, the JA/MS-BB antenna comes factory tuned in an elegant, ready-to-install and streamlined design.

## Jampro Family of RCEC Mask Filters

Jampro offers a family of RCEC mask filters designed to provide superior mask filter performance at an affordable price. Cross coupling creates steep rejection skirts and the high-Q cavities provide low pass band insertion loss in a compact package.

Models include:

RCEC-386-UM – 5kW AVG, UHF 8"/203.2mm mask filter ATSC/DVB-T/ISDB-T

RCEC-206-UMFB – 2.5kW AVG, 6-section cross-coupled UHF DVB-T non-critical mask filter

RCEC-#F6-UM – 500W, UHF 4"/101.6mm mask filter ATSC/DVB-T/ISDB-T

RCEC-DT6-UM – 250W, UHF 2"/50.8mm mask filter ATSC/DVB-T/ISDB-T

### JAVA Broadband Log Periodic FM Band II Antenna

The JAVA broadband log periodic FM antenna system is ideal for high gain directional applications, and is available on any standard FM channel (87.5 to 107.9 MHz). JAVA is produced from either rugged aluminum or hot dipped galvanized steel for extreme conditions/environments. Custom directional azimuth pattern and FCC Certification is available on a full-scale test range to conform to the customer's requirements.

### JCPB Broadband FM antenna

JAMPRO JCPB sidemount antenna - broadband version of the PENETRATOR - is available with radomes for durability. An industry standard for quality and performance, the JCPB features excellent VSWR and bandwidth. Each bay consists of a PENETRATOR style radiating element supported by galvanized steel mounting brackets; standard round leg mounting brackets for a uniform face tower are included. Silver plated inner conductor connectors are used throughout for maximum contact life and minimum power loss.

### About Jampro

Jampro Antennas Inc., established to answer the need for quality broadcast systems at a reasonable price, is a leading supplier of antennas, combiners & filters and RF components for every application in the broadcast industry. Reputed for innovation and customization, Jampro builds each system to the specifications of the individual broadcaster. From the first system delivered in 1954 to those installed today, the Company is committed to consistent performance and quality founded on solid engineering. Today, over 25,000 broadcasters worldwide benefit from the quality and performance provided by Jampro systems. For additional JAMPRO information, please visit: [www.jampro.com](http://www.jampro.com).
